DETAILED ACTION

Status of Claims

- 1. This action is in response to the amendment filed on 03 June 2005.
- 2. Claims 1, 8, 11, and 18 have been amended.
- 3. Claim 20 has been cancelled.
- **4.** Claims 1, 2, 5-12, and 15-19 have been examined.
- 5. The rejections of claims 1, 2, 5-12, and 15-19 have been updated.

RESPONSE TO ARGUMENTS

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 1, 2, 5-12, and 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schneck et al, (US 5,933,498 A) in view of Alexander et al. (US 6,134,593 A), in view of Slivka et al. (US 6,049,671 A), and further in view of Applicant's own admissions.

Art Unit: 3621

Examiner's Note: The Examiner has pointed out particular references contained in the prior art of record within the body of this action for the convenience of the Applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply. Applicant, in preparing the response, should consider fully the entire reference as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or

Claims 1, 11, and 20:

disclosed by the Examiner.

Schneck, as shown, discloses:

generating an installer identifier at the local machine based on the software product in response to a request to install the software product on the local machine (see at least Fig 1-3; associated text; Fig 3: Items 127, 128, 130: "Version Number 127; Authentication 128; License Number of these Rules 130);

- the generated installer identifier represent a characteristic of the software product medium on which the software product is stored (see at least Fig 3; associated text; Col 10, L59 Col 11, L43).
- comparing the generated installer identifier to a stored installer identifier on the software product (see at least above citations; Fig 10(a-b); Col 17-20: "The Accessing Operation");
- storing a license file on the local machine in response to a match between the generated installer identifier and the stored installer identifier (see at least Fig 11; associated text; Col 22, L51 C24, L38; Schneck's "Rules" are equivalent to applicant's "license"); and
- enabling a complete installation [and execution claim 11] of the software
 product on the local machine, in response to the match between the generated

installer identifier and the stored installer identifier (see at least all above citations; Col 30, L6-47);

whereby the stored license file is associated only with the software product installed on the local machine and can be subsequently accessed to enable the execution of the completely installed software product on the local machine but cannot be used with a separate software product (see at least same citation as above).

Schneck does not specifically disclose that the above teachings may be applied to software installation on a local machine, with software identifiers as particularly claimed by the instant invention. Alexander, however, in an analogous are directed explicitly to the installation of software product onto client machines, does disclose these features. See at least the brief summary and other detailed and associated text. It would have been obvious to one of ordinary skill in the art at the time of the invention to combine the System for Controlling Access and Distribution of Digital Property as disclosed by Schneck with Alexander's software installation techniques because software is a subset of digital property.

The combination of Schneck/Alexander does not specifically disclose the hashing algorithm and associated steps as claimed above and disclosed in the specification. Slivka, however, in at least column 18, lines 6-15 discloses installation of a software product only after ensuring hash values are identical. It would have been obvious to one of ordinary skill in the art at the time of the invention to combine the System for Controlling Access and Distribution of Digital Property as disclosed by Schneck with Alexander's software installation techniques and modify them to include Slivka's hashing technique because this ensures that the "...self-extracting executable distribution file is deemed secure and free from accidental or intentional corruption."

The combination of Schneck/Alexander/Slivka does not specifically disclose machine, including installing at least one run-time file associated with the software product. Applicant, however, in the background of the specification, page 2, does. It would have been obvious to one

Art Unit: 3621

of ordinary skill in the art at the time of the invention to combine the System for Controlling Access and Distribution of Digital Property as disclosed by Schneck/Alexander/Slivka with Applicant's well-known use of a run-time executable file because it is a well-known technique for installing applications locally on an end-user's machine.

Claims 2 and 12:

The combination of Schneck/Alexander/Slivka/AOA discloses all the limitations of claims 1, and 11. Schneck further discloses a computer readable medium having stored thereon computer-executable instructions for performing the method of claims 1 and 11 (see at least Col 7, L27-34).

Claims 5 and 15:

The combination of Schneck/Alexander/Slivka/AOA discloses all the limitations of claims 1, and 11. Schneck further discloses the generated installer identifier represents a characteristic of a file list corresponding to the software product media (see at least Fig 3; associated text; Col 10, L59 - Col 11, L43).

Claims 6 and 16:

The combination of Schneck/Alexander/Slivka/AOA discloses all the limitations of claims 1, and 11. Schneck further discloses the generated installer identifier is a hash value representing the characteristic of the file list corresponding to the software product media (see at least Fig 3, "Authentication (hash) 128").

Claims 7 and 17:

The combination of Schneck/Alexander/Slivka/AOA discloses all the limitations of claims 1, and 11. Schneck further discloses *receiving a software product key* (see at least Fig 5; associated text; CoI 12, L1-65).

Claims 8 and 18:

The combination of Schneck/Alexander/Slivka/AOA discloses all the limitations of claims 1, and 11. Schneck further discloses *installing on the local machine at least one run-time file associated with the software product, occurs in response to a determination that the received software product key is a correct software product key (see at least Col 18, L52-61; Col 34, L14-28).*

As per claim 9:

The combination of Schneck/Alexander/Slivka/AOA discloses all the limitations of claims 1, and 11. Schneck further discloses *executing a set-up program* (see at least Col 30, L5-28).

Claims 10 and 19:

The combination of Schneck/Alexander/Slivka/AOA discloses all the limitations of claims 1, and 11. Schneck further discloses the license file is stored in a hardware signature file (see at least Col 7, L63 - Col 8, L5; Col 12, L1-16).

Art Unit: 3621

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

10. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry of a general nature or relating to the status of this application or concerning this communication or earlier communications from the Examiner should be directed to James A. Reagan whose telephone number is 571.272.6710. The Examiner can normally be reached on Monday-Friday, 9:30am-5:00pm. If attempts to reach the examiner by telephone are unsuccessful, the Examiner's supervisor, James Trammell can be reached at 571.272.6712. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://portal.uspto.gov/external/portal/pair. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866.217.9197 (toll-free).

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

571-273-8300 [Official communications, After Final communications labeled "Box AF"]

571-273-8300 [Informal/Draft communications, labeled "PROPOSED" or "DRAFT"]

Hand delivered responses should be brought to the United States Patent and Trademark Office Customer Service Window:
